Education

Ajay Kumar Garg Engineering College, Ghaziabad **2023 – 2026**
B.Tech in Computer Science Engineering *Percentage: 75%*

Technical Skills

Languages: C++, Java, Python, JavaScript, SQL
Frontend: HTML5, CSS, React.js, Tailwind CSS, Next.js
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Django, Django REST Framework, FastAPI
Database: MongoDB, PostgreSQL
Tools: Git, GitHub, Postman, Vercel, Docker
Concepts: CRUD, API Integration, Responsive Design, Version Control

Experience

Backend Developer Intern — NextBigE **Nov 2025 – April 2026**
- Developed and maintained **15+ production-ready REST APIs** using **Django REST Framework**, supporting content publishing, article management, and frontend integrations.
- Architected relational database schemas for **articles, categories, tags, and metadata**; optimized ORM queries with **select_related** and **prefetch_related**, reducing query execution time by **40%+**.
- Engineered advanced **search, filtering, pagination, validation, and text-processing pipelines** using Python, enabling efficient management of articles and improving content discoverability.

Backend Developer Intern — PureWashr Pvt. Ltd. **Sep 2024 – Nov 2024**
- Developed and maintained **10+ REST APIs** for order booking, service management, and customer workflows, ensuring reliable communication between frontend and backend systems.
- Designed scalable **database schemas, business validations, and workflow logic**, improving data integrity and supporting seamless order lifecycle management.
- Performed comprehensive API testing and debugging using **Postman**, validating request/response flows, reducing integration issues, and improving overall system reliability.

Projects

LilChat | Live | *React.js, Django REST Framework, PostgreSQL, Clerk, Cloudinary* **GitHub**
- Built a full-stack social media platform inspired by Instagram with **posts, likes, comments, follow/unfollow, real-time interactions, and messaging** features.
- Developed **20+ REST APIs** using **Django REST Framework** for feed generation, user management, content delivery, and chatbot integration.
- Integrated **Clerk Authentication** and **Cloudinary** for secure user access, media uploads, and asset management.
- Implemented personalized feeds, engagement tracking, and responsive UI using **React, PostgreSQL, and Django**, delivering a seamless cross-device experience.

Lost & Found AI | Live | *React, Django REST Framework, PostgreSQL* **GitHub**
- Developed an AI-powered missing-person platform with role-based access for relatives, contributors, and administrators using **JWT authentication** and Django REST Framework.
- Integrated a **face recognition pipeline** using Python, **dlib**, and Modal to generate 128-dimensional face embeddings and identify potential matches between missing and found person photographs.
- Built REST APIs for report management, photo uploads, match tracking, dashboards, and in-app notifications, with **PostgreSQL** for data management and Cloudinary for image storage.

LMS | Live | *MERN, OpenAI API* **GitHub**
- Built an **AI-powered Learning Management System** that generates personalized learning paths and course roadmaps from user prompts.
- Integrated **OpenAI API** to dynamically generate structured modules, lessons, quizzes, and learning recommendations.
- Implemented authentication, course management, and progress tracking using the **MERN stack**, enabling an end-to-end learning workflow.

Achievements

2nd Prize — IDE Bootcamp 2024 Certificate
- Recognized for innovative project development and presentation.

Top 40 Teams — AKTU Innovation Hub Certificate
- Selected among the top 40 teams for innovative solution development.
